## Planner Sticker Sampler

Thanks for downloading this free planner sticker sampler! I hope you enjoy using them as much I enjoyed making them. Here are some tips & tricks for printing success.

### Before You Print

- Check your printer's alignment before you begin.
  - Your manual (often available at your printer company's website, like Epson.com) will have instructions for checking your "printer head alignment". This will help catch and prevent streaks.
- Print a test page.
  - Print on regular printer paper before committing to sticker paper.
- Make sure your sticker paper is inserted into your printer properly. :)
- Make sure your printer's paper settings match the sticker paper you're using
  - e.g. if you have glossy sticker paper, you may need to use the "photo paper" settings. Read the instructions on your chosen sticker paper.
  - I've found online reviews to also be a great source of information on what has worked for other crafters.
  - Try searching your paper and taking a peek at the reviews.
- Print the pages at 100%
  - Don't "Stretch to Fit" or otherwise alter the dimensions for best results.

### Sticker Paper

These are affiliate links. I earn a small commission when you purchase items using my link, which helps me maintain celiaagnes.com :)

- [Avery makes great sticker paper](#), and it's widely available at office supply stores.
- [LD also makes great sticker paper](#), and at an amazing price.
- [Staples generic brand of sticker paper](#) also receives good reviews.
